

## MEAN AND MAXIMUM BUTT JOINT WIDTHS

### MEAN AND MAXIMUM GAP WIDTHS BETWEEN ENDS OF CONCRETE PIPES FOR THE USE OF DS BL OR ANKERPLUS SEALS

DN	BL / Ankerplus	Mean gap width <sup>1)</sup>	Maximum gap width <sup>2)</sup>
300	12	10	18
400 - 600	14	10	20
700 - 1200	18	10	24
1300 - 1600	22	15	30
1800 - 2600	26	15	35

<sup>1)</sup> **Mean width of gap:**

The mean width of gap on the total circumference of the pipe should not exceed the indicated specifications ( $[\max b + \min b] \times 0.5 \leq \text{mean } b$ ).

<sup>2)</sup> **Maximum width of gap:**

Maximum width of gap: Permissible limits caused by differences resulting from laying the pipes and non-parallel front sides of the pipe in a part of the circumference of the pipe.
